The authors deeply regret that the below typesetting error occurred in the printed version of the above article.

In the Case report section, line 7-10. The images also demonstrated that the left hepatic artery and gastroduodenal artery originated from the superior mesenteric artery (SMA) and that the left hepatic artery arose from the left gastric artery (Fig 1A. B). This should state; The images also demonstrated that the left hepatic artery and gastroduodenal artery originated from the superior mesenteric artery (SMA) and that the right hepatic artery arose from the left gastric artery (Fig 1A. B).
